

Editorial

In the past year, MIC has changed from a printed journal to an electronic journal. This is of course a major change for MIC. We are aware that some subscribers have experienced problems with accessing MIC on the Web. We apologize for these problems, which we believe have now been solved.

The aim is to lower publication costs while maintaining publication quality and the accessibility of the journal articles. We hope for the loyalty of both subscribers, contributing authors and other supporters in this time of change.

In the article "The Riccati Equation – An Economic Fundamental Equation which Describes Marginal Movement in Time" published in 2006, vol. 27, No. 1, the affiliation of the authors was omitted in error. Lars Petter Lystad, Per-Ole Nyman and Ralph Høibakk are all professors at Narvik University College.

Trondheim, January 2007.
